Single Layer Perceptron Model

- Best results for C1 and C2:

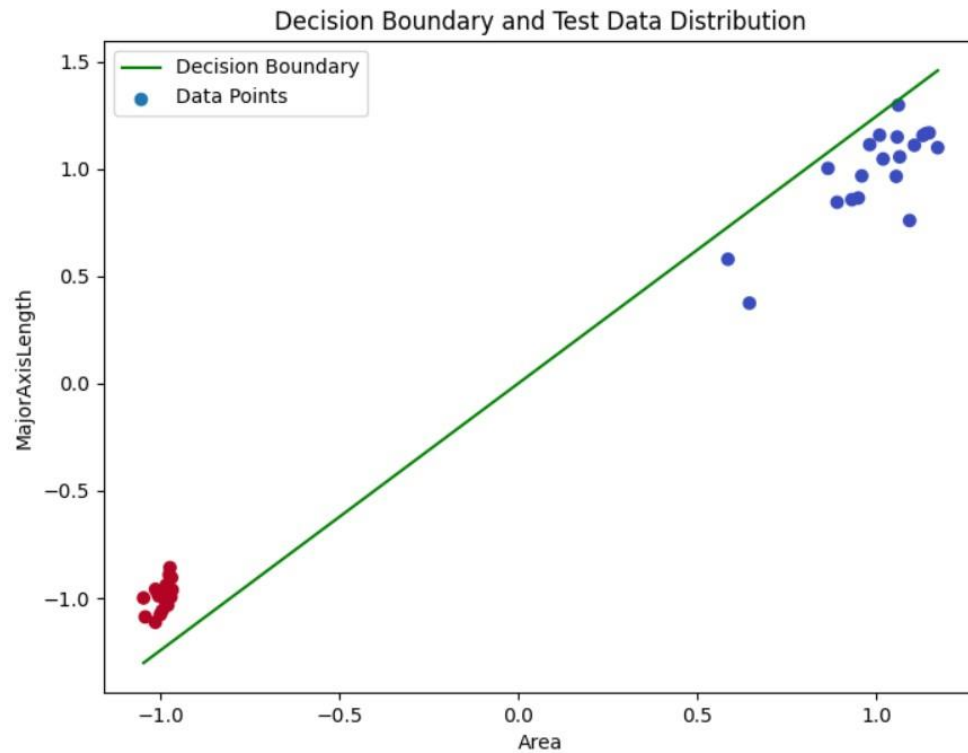

```
Perceptron Accuracy = 100.0 %  
confusion_matrix [[20, 0], [0, 20]]
```

- **Best results for C2 and C3:**

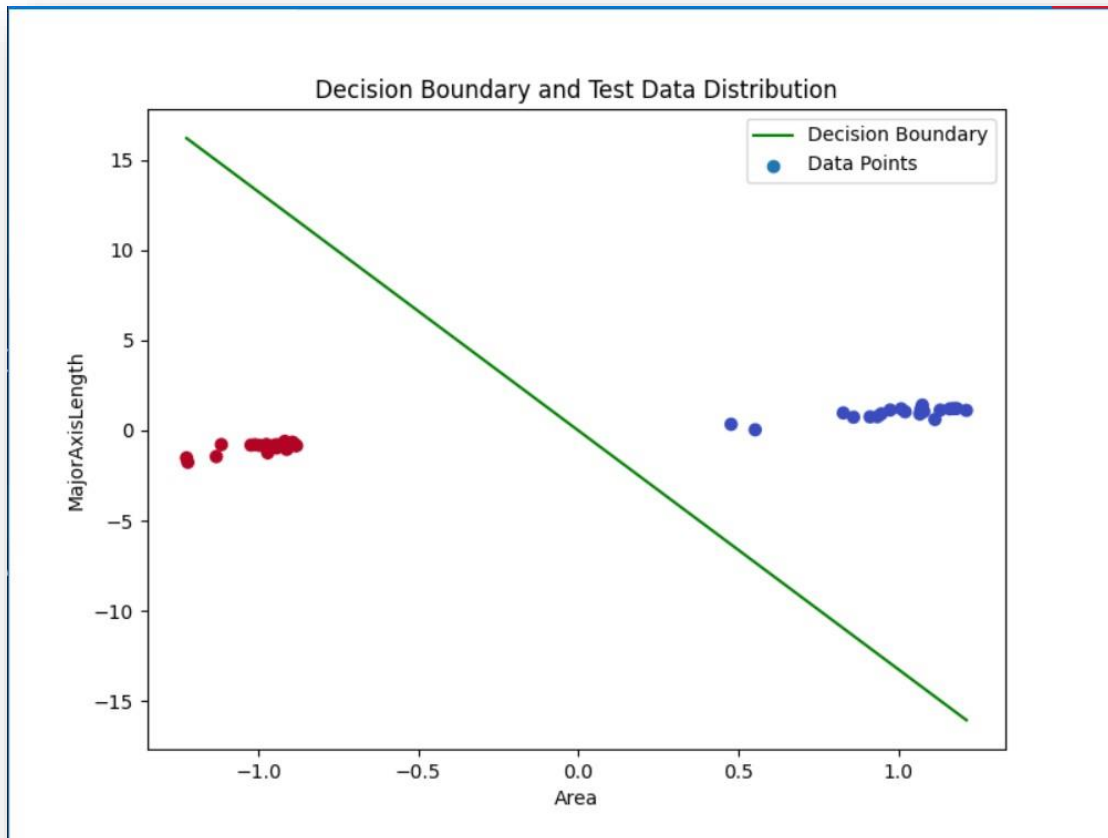

- Best results for C1 and C3:

```
Perceptron Accuracy = 100.0 %  
confusion_matrix [[20, 0], [0, 20]]
```

Adaline Model

- Best results for C1 and C2:

```
AdaLine Accuracy = 100.0 %  
confusion_matrix [[20, 0], [0, 20]]
```

- **Best results for C2 and C3:**

```
AdaLine Accuracy = 100.0 %  
confusion_matrix [[20, 0], [0, 20]]
```

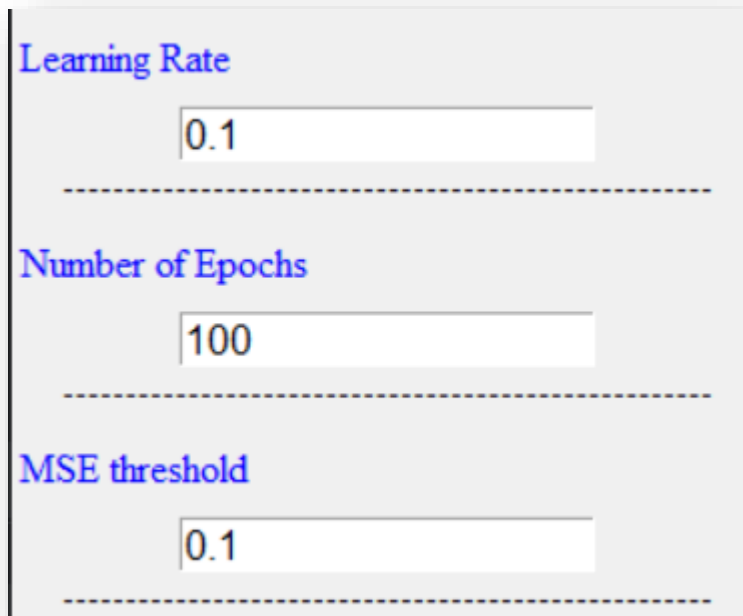

- Best results for C1 and C3:

```
AdaLine Accuracy = 100.0 %  
confusion_matrix [[20, 0], [0, 20]]
```

Conclusion

The Best values for each hyperparameter:

Learning Rate

0.1

Number of Epochs

100

MSE threshold

0.1

Through several trials, we concluded that most features yield similar results, however, most notably Area & Perimeter proved the best results and accuracy consistently across the models.
